

EU Declaration of Conformity

1. Declaration

We, the manufacturer, GOODDATA LABS SL, Calle Berlin 16, Bloque 4, 2-A, Alcorcon, 28922, Spain, declare under our sole responsibility that the product to which this declaration relates is in conformity with the essential requirements and other relevant provisions of the applicable EU directives and harmonised standards listed below.

2. Product Information

Product Name: ST2VGA Adapter

Model: ST2VGA Adapter Rev.3

Batch/Series: ST2VGA Adapter Revision 3

Revision: REV3.4.0

3. Object of the declaration

Passive VGA adapter for Atari 520ST / 520STF / 520STFM / 520STE, 1040ST / 1040STF / 1040STFM / 1040STE, Mega ST and Mega STE computers. The standalone external dongle connects to the Atari monitor port and routes the analog RGB video to a compatible multisync VGA display via a DE-15 connector while preserving the original Atari scan frequencies (approximately 15 kHz horizontal sync in colour modes and 31 kHz in monochrome). Audio is routed to a 3.5 mm jack. The device draws +12 V DC from the host computer via the Atari monitor port and has no external power connector.

4. The object of the declaration described above is in conformity with the relevant Union harmonisation legislation:

Directive	Description
2014/30/EU	Electromagnetic Compatibility (EMC) Directive
2011/65/EU + (EU) 2015/863	Restriction of Hazardous Substances Directive (RoHS 3)

5. References to the relevant harmonised standards used:

Standard	Description
EN IEC 61000-6-1:2019	Electromagnetic compatibility (EMC) - Generic immunity standard for residential, commercial and light-industrial environments
EN IEC 61000-6-3:2021	Electromagnetic compatibility (EMC) - Generic emission standard for residential, commercial and light-industrial environments
EN IEC 63000:2018	Technical documentation for the assessment of electrical and electronic products with respect to the restriction of hazardous substances

6. Additional Information

This product is a standalone external adapter (dongle) intended to be connected between the monitor port of an Atari 520ST / 520STF / 520STFM / 520STE, 1040ST / 1040STF / 1040STFM / 1040STE, Mega ST or Mega STE computer and a compatible multisync VGA display. Power (+12 V DC) is drawn from the host computer via the Atari monitor port; the product has no external power input. The device operates below 50 V DC and is not mains-powered — Directive 2014/35/EU (Low Voltage Directive) does not apply. The device contains no radio transmitter, no intentional RF radiator, and no wireless communication functionality. The product uses low-voltage electronic circuitry to condition, transform and route the analog video and audio signals from the Atari monitor port to the VGA and audio connectors.
