

EU Declaration of Conformity

1. Declaration

We, the manufacturer, GOODDATA LABS SL, Calle Berlin 16, Bloque 4, 2-A, Alcorcon, 28922, Spain, declare under our sole responsibility that the product to which this declaration relates is in conformity with the essential requirements and other relevant provisions of the applicable EU directives and harmonised standards listed below.

2. Product Information

Product Name: SidecarTridge Multi-Device

Model: SidecarTridge Multi-Device v3 with Raspberry Pi Pico W (Rev.3.1.2, reflow-soldered)

Batch/Series: SidecarTridge Multi-Device Revision 3

Revision: REV3.1.2

3. Object of the declaration

SidecarTridge Multi-Device v3 for Atari ST, STE, Mega ST, Mega STE, TT and Falcon computers, supplied fully assembled with a reflow-soldered Raspberry Pi Pico W / Pico WH module installed. The product plugs into the lateral cartridge port of a compatible Atari motherboard and is powered exclusively from the host through that port (+5 V DC bus). The main PCB provides cartridge-port connection, bus-interface and level-shifting logic and mechanical hardware; the integrated Raspberry Pi Pico W / Pico WH module runs the firmware that emulates ROMs, floppy and hard disks, real-time clock, keyboard, mouse and similar devices, exposes a USB interface for firmware loading and file transfer, and provides 2.4 GHz Wi-Fi and Bluetooth functionality through its pre-assessed radio.

4. The object of the declaration described above is in conformity with the relevant Union harmonisation legislation:

Directive	Description
2014/53/EU	Radio Equipment Directive (RED)
2011/65/EU + (EU) 2015/863	Restriction of Hazardous Substances Directive (RoHS 3)

5. References to the relevant harmonised standards used:

Standard	Description
EN 300 328 V2.2.2	Wideband transmission systems - Data transmission equipment operating in the 2.4 GHz band - Harmonised Standard for access to radio spectrum (Article 3.2 of Directive 2014/53/EU)
EN 301 489-1 V2.2.3	ElectroMagnetic Compatibility (EMC) standard for radio equipment and services - Part 1: Common technical requirements (Article 3.1(b) of Directive 2014/53/EU)
EN 301 489-17 V3.2.4	ElectroMagnetic Compatibility (EMC) standard for radio equipment - Part 17: Specific conditions for Broadband Data Transmission Systems (Article 3.1(b) of Directive 2014/53/EU)
EN 62479:2010	Assessment of the compliance of low-power electronic and electrical equipment with the basic restrictions related to human exposure to electromagnetic fields (10 MHz to 300 GHz) (Article 3.1(a) of Directive 2014/53/EU)
EN IEC 63000:2018	Technical documentation for the assessment of electrical and electronic products with respect to the restriction of hazardous substances

6. Additional Information

This product is an internal sub-assembly intended for installation in the lateral cartridge port of a compatible Atari ST-family motherboard (ST, STE, Mega ST, Mega STE, TT or Falcon). It is powered exclusively from the host system via the cartridge-port +5 V rail and operates below 50 V DC. Radio-module integration: this product integrates a pre-assessed radio module (Raspberry Pi Pico W / Pico WH) providing 2.4 GHz Wi-Fi and Bluetooth functionality. Compliance with the essential requirements of Article 3.2 (efficient use of radio spectrum) and the relevant requirements of Articles 3.1(a) (health and safety) and 3.1(b) (electromagnetic compatibility) of Directive 2014/53/EU is ensured through the use of this module in accordance with the module manufacturer's integration guidelines. No modifications affecting the radio performance have been made. The harmonised standards listed above were applied by the radio-module manufacturer; they have not been re-assessed at final product level by GOODDATA LABS SL. Directive 2014/30/EU (EMC) and Directive 2014/35/EU (Low Voltage) do not apply in addition to Directive 2014/53/EU.
