

UK DECLARATION OF CONFORMITY (UKCA)

1. Declaration

We, the manufacturer, GOODDATA LABS SL, Calle Berlin 16, Bloque 4, 2-A, Alcorcon, 28922, Spain, declare under our sole responsibility that the product to which this declaration relates is in conformity with the essential requirements and other relevant provisions of the applicable UK statutory instruments and designated standards listed below.

2. Product Information

Product Name: SidecarTridge Kickstart Multi ROM

Model: SidecarTridge Kickstart Multi ROM Amiga Edition

Batch/Series: SidecarTridge Kickstart Multi ROM Revision 1

Revision: REV1.1.0

3. Object of the declaration

Programmable Kickstart ROM emulator for Commodore Amiga computers (Amiga 500 and Amiga 2000 fully supported; compatibility with A600 and A1200 under evaluation). The module plugs directly into the Kickstart ROM socket of the Amiga motherboard and provides up to 31 selectable Kickstart images from an onboard 16 MB flash, driven by a Raspberry RP2350 microcontroller. A USB connector is used for local file transfer (mass-storage mode for managing Kickstart images) and firmware updates only; the device has no wireless or radio functionality.

4. The object of the declaration described above is in conformity with the relevant UK statutory instruments:

Statutory Instrument	Description
S.I. 2016/1091	Electromagnetic Compatibility Regulations 2016
S.I. 2012/3032	Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2012 (UK RoHS)

5. References to the relevant designated standards used:

Standard	Description
BS EN IEC 61000-6-1:2019	Electromagnetic compatibility (EMC) - Generic immunity standard for residential, commercial and light-industrial environments
BS EN IEC 61000-6-3:2021	Electromagnetic compatibility (EMC) - Generic emission standard for residential, commercial and light-industrial environments
BS EN IEC 63000:2018	Technical documentation for the assessment of electrical and electronic products with respect to the restriction of hazardous substances

6. Additional Information

This product is an internal ROM-emulator sub-assembly intended for installation in the Kickstart ROM socket of a Commodore Amiga motherboard. It is powered from the host system via the ROM socket, operates below 50 V DC, contains no radio transmitter or intentional RF radiator, and is not mains-powered. The Electrical Equipment (Safety) Regulations 2016 do not apply.

7. Technical documentation

Technical documentation is held by GOODDATA LABS SL.
