

EU Declaration of Conformity

1. Declaration

We, the manufacturer, GOODDATA LABS SL, Calle Berlin 16, Bloque 4, 2-A, Alcorcon, 28922, Spain, declare under our sole responsibility that the product to which this declaration relates is in conformity with the essential requirements and other relevant provisions of the applicable EU directives and harmonised standards listed below.

2. Product Information

Product Name: SidecarTridge Multi-Device Kit

Model: SidecarTridge Multi-Device Kit v3 (Rev.3.1.2, PCB only)

Batch/Series: SidecarTridge Multi-Device Kit Revision 3

Revision: REV3.1.2

3. Object of the declaration

PCB-only kit of the SidecarTridge Multi-Device v3 for Atari ST, STE, Mega ST, Mega STE, TT and Falcon computers. The kit contains the main printed circuit board and its fitted components — lateral cartridge-port connector, bus-interface and level-shifting logic, headers for a Raspberry Pi Pico W / Pico WH module, and associated passives and mechanical hardware — but does NOT include the Raspberry Pi Pico W / Pico WH module itself. The kit itself provides only bus-interface and level-shifting hardware; all device-emulation functionality (ROM, floppy disk, hard disk, real-time clock, keyboard, mouse, and similar) is performed by firmware running on the Raspberry Pi Pico W / Pico WH module, which is not supplied with this product. In the configuration covered by this declaration no radio, Wi-Fi or Bluetooth functionality is present. When installed by the end user, the kit plugs into the lateral cartridge port of a compatible Atari motherboard and is powered exclusively from the host through that port (+5 V DC bus).

4. The object of the declaration described above is in conformity with the relevant Union harmonisation legislation:

Directive	Description
2014/30/EU	Electromagnetic Compatibility (EMC) Directive
2011/65/EU + (EU) 2015/863	Restriction of Hazardous Substances Directive (RoHS 3)

5. References to the relevant harmonised standards used:

Standard	Description
EN IEC 61000-6-1:2019	Electromagnetic compatibility (EMC) - Generic immunity standard for residential, commercial and light-industrial environments
EN IEC 61000-6-3:2021	Electromagnetic compatibility (EMC) - Generic emission standard for residential, commercial and light-industrial environments
EN IEC 63000:2018	Technical documentation for the assessment of electrical and electronic products with respect to the restriction of hazardous substances

6. Additional Information

This declaration covers the SidecarTridge Multi-Device PCB kit alone, supplied without the Raspberry Pi Pico W / Pico WH module. In this configuration the product is an internal sub-assembly intended for installation in the lateral cartridge port of a compatible Atari ST-family motherboard. It is powered exclusively from the host system via the cartridge-port +5 V rail, operates below 50 V DC, contains no radio transmitter, no intentional RF radiator, and no wireless communication functionality. Directive 2014/35/EU (Low Voltage Directive) does not apply. The kit is not a finished end-user product on its own; it requires the subsequent installation of a Raspberry Pi Pico W / Pico WH module to operate. Any finished apparatus assembled by combining this kit with a radio-equipped module is a separate product placed on the market by its assembler, and its conformity — including with Directive 2014/53/EU (Radio Equipment Directive) where applicable — is the responsibility of that assembler.
