

EU Declaration of Conformity

1. Declaration

We, the manufacturer, GOODDATA LABS SL, Calle Berlin 16, Bloque 4, 2-A, Alcorcon, 28922, Spain, declare under our sole responsibility that the product to which this declaration relates is in conformity with the essential requirements and other relevant provisions of the applicable EU directives and harmonised standards listed below.

2. Product Information

Product Name: SidecarTridge ROM Emulator

Model: SidecarTridge ROM Emulator Core Module v3 (Rev.3.0.0)

Batch/Series: SidecarTridge ROM Emulator Revision 3

Revision: REV3.0.0

3. Object of the declaration

Signal-accurate ROM emulator core module intended for integration into carrier boards and host hardware. The 55 mm × 25 mm single-sided PCB uses a Raspberry RP2350 microcontroller with PIO to emulate EPROM / EEPROM / flash devices (27C / 28C series, 4 KB to 512 KB, 8- or 16-bit buses) at the electrical and protocol level, storing up to 64 images in a 16 MB onboard flash. The module exposes its storage as a FAT12 USB mass-storage volume over a USB-C connector for image loading and firmware updates on Windows, macOS and Linux. Host integration is via castellated edges and mounting holes; an optional JST UART/DEBUG header is provided. Power is supplied at +5 V DC, either through the USB-C connector or an external rail from the carrier board. The module has no wireless or radio functionality and is not a standalone consumer product.

4. The object of the declaration described above is in conformity with the relevant Union harmonisation legislation:

Directive	Description
2014/30/EU	Electromagnetic Compatibility (EMC) Directive
2011/65/EU + (EU) 2015/863	Restriction of Hazardous Substances Directive (RoHS 3)

5. References to the relevant harmonised standards used:

Standard	Description
EN IEC 61000-6-1:2019	Electromagnetic compatibility (EMC) - Generic immunity standard for residential, commercial and light-industrial environments
EN IEC 61000-6-3:2021	Electromagnetic compatibility (EMC) - Generic emission standard for residential, commercial and light-industrial environments
EN IEC 63000:2018	Technical documentation for the assessment of electrical and electronic products with respect to the restriction of hazardous substances

6. Additional Information

This product is an internal core module intended for integration into a carrier board or host hardware (e.g. via castellated edges, mounting holes and/or the SidecarTridge TOS Emulator and Kickstart Multi ROM product lines, which target the Atari ST / STE / Mega ST / Mega STE and classic Commodore Amiga platforms respectively). It is powered at +5 V DC, either from the USB-C connector or from an external supply provided by the carrier board, and operates below 50 V DC. The USB-C connector exposes the onboard flash as a FAT12 mass-storage volume and is used for loading ROM images and firmware updates. The module contains no radio transmitter, no intentional RF radiator, and no wireless communication functionality. Directive 2014/35/EU (Low Voltage Directive) does not apply. The module is not a finished end-user product on its own; it is supplied as a component for integration into a larger apparatus, whose overall conformity is the responsibility of the assembler placing the finished product on the market.
