

EU Declaration of Conformity

1. Declaration

We, the manufacturer, GOODDATA LABS SL, Calle Berlin 16, Bloque 4, 2-A, Alcorcon, 28922, Spain, declare under our sole responsibility that the product to which this declaration relates is in conformity with the essential requirements and other relevant provisions of the applicable EU directives and harmonised standards listed below.

2. Product Information

Product Name: ACSI2STM Mini

Model: ACSI2STM Mini Hard Disk (Rev.1.1)

Batch/Series: ACSI2STM Mini Revision 1

Revision: REV1.1

3. Object of the declaration

Standalone external hard-disk emulator for Atari ST-family computers (Atari 520 STF, 1040 STE, Mega ST, Mega STE and Atari TT). The unit connects to the Atari ACSI/DMA port through an integrated DB-19 D-SUB connector and presents SCSI-like disk images stored on up to two microSD cards. A CR1220 / CR1225 3 V primary cell backs an on-board real-time clock. The unit is driven by an STM32 microcontroller on a 65 mm × 35 mm PCB. A USB-C connector is used solely as a low-voltage DC power input; no USB data interface or high-speed communication is implemented. The Mini variant does not include the daisy-chain IDC-20 header or the external LED header present on the Compact variant.

4. The object of the declaration described above is in conformity with the relevant Union harmonisation legislation:

Directive	Description
2014/30/EU	Electromagnetic Compatibility (EMC) Directive
2011/65/EU + (EU) 2015/863	Restriction of Hazardous Substances Directive (RoHS 3)

5. References to the relevant harmonised standards used:

Standard	Description
EN IEC 61000-6-1:2019	Electromagnetic compatibility (EMC) - Generic immunity standard for residential, commercial and light-industrial environments
EN IEC 61000-6-3:2021	Electromagnetic compatibility (EMC) - Generic emission standard for residential, commercial and light-industrial environments
EN IEC 63000:2018	Technical documentation for the assessment of electrical and electronic products with respect to the restriction of hazardous substances

6. Additional Information

This product is a standalone external device intended to be connected to the ACSI/DMA port of a compatible Atari ST-family computer through an integrated DB-19 connector, to emulate SCSI-like hard disks using microSD storage. Power (+5 V DC) is supplied externally through a USB-C connector used solely as a low-voltage DC power input; no USB data interface or high-speed communication is implemented on the device. The device operates below 50 V DC and is not mains-powered — Directive 2014/35/EU (Low Voltage Directive) does not apply. The device contains no radio transmitter, no intentional RF radiator, and no wireless communication functionality. The external +5 V DC supply (e.g. USB power adapter) is outside the scope of this declaration and must itself be CE-marked. The unit also contains one user-replaceable CR1220 / CR1225 primary lithium cell used to maintain the on-board real-time clock; handling and disposal of this cell are governed by the applicable batteries legislation and are outside the scope of this declaration.
